Vol. 34, No. 35. CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. FRIDAY, MARCH 2, 1928.

California Ranch News

Chico and Durham peach growers last week announced they would back a $50,000 bond issue for construction of a cannery at Chico. The plan will be submitted at a membership meeting of the chamber February 15.

Thursday, February 23, has been set as the date for the annual citrus institute, held each year in connection with the National Orange Show at San Bernardino. The day is set aside for the benefit of growers, enabling them to get together and exchange ideas on citrus problems encountered during the past season.

California Napoleon's Abbie, a Jersey owned by the University of California, has established a new record for butterfat production. In 305 days she yielded 10,250 pounds of milk containing 638.47 pounds as a senior two year old. This gives a AAA record was made at the University Farm at Davis.

Total income of farmers of this State during 1927 will average practically the same as 1926. Field crop value in 1927 was $163,000,000, compared with a five-year average of $177,000,000, and the farm value of fruit and nut crops was $220,000,000, compared with a five-year average of $210,000,000. The farm value of the vegetable and truck crops will approximate $60,000,000, the survey reveals.

Preliminary cotton raising tests in Superior California have proved so successful that plantings will be increased from 1,500 acres in 1927 to 13,000 acres this year, bringing cotton to a million dollar industry in the Sacramento Valley. This is according to Lynn Morrill, manager of the Valley Cotton Gin Company, which gins and sells the cotton raised in the Sacramento Valley.

The California Prune and Apricot Growers' Association announces that it is now preparing checks in final payment of deliveries of 1926 crop prunes and that this work will probably be completed and checks mailed to growers by February 17. Final payment checks to grower-members of the association will vary considerably in amount, depending upon the size and quality of prunes delivered by them in 1926, but the aggregate amount of the final payment will amount to slightly over $301,000 in cash, and approximately $89,000 in credits to growers' equity accounts, or a total of approximately $390,000.

Approximately 3,150,000 bags of the 1927 rice crop is still being held by the California growers. The Rice Growers' Association of California estimates that the total crop for the year was 4,129,166 bags. Nearly half the rice on hand is either "wet" or "damp" rice, containing from 16 to 22 per cent moisture. This condition was caused by storms during the harvesting season. It is estimated that a total of 1,000,000 bags of rice will show damage due to this condition, and that disposition of this grade of rice constitutes the association's chief marketing problem.

Though the horse and mule lost further standing in California livestock circles during the past year, all other farm animals showed material gains, both in numbers and in value. With new models announced for almost all leading makes of automobiles, statisticians of the federal-state crop reporting service, E. E. Kaufman, chief, were able to find only 290,000 horses on California farms on January 1, 1928. This number is 5,000 less than at the close of 1926 and a decrease of 12,000 since 1925. And to heap insult onto injury, horses this year are value at only $73 per head, against $76 for the two preceeding years. The state's stable residents had a total worth of $21,302,000. Mules stubbornly held their own at 53,000, but their value dropped from $89 a head to $83, and their total valuation was only $4,420,000.

The outlook for the California cattle and sheep owner at present is the best in seven years, E. E. Kaufman, State-Federtl statistician, declared a few days ago, in his annual report on livestock conditions. The total value of all main types of livestock on California farms was given as $182,301,000, a marked gain as compared with $167,591,000 a year ago. The State-Federal census showed increases in the value of dairy cattle, beef cattle and sheep, while a decrease was noted in worth of horses, mules and swine.

Golden State
News of Interest to All

Four broadcasting stations are being established by the State Fish and Game Commission to effect rapid communication betwene game wardens throughout the State and the Sacramento headquarters of the commission. About 75 per cent of the wardens patrolling fishing and hunting grounds will carry portable receiving sets. The broadcasting stations will be located at Los Angeles, San Francisco, Sacramento and San Diego.

The State collected $851,125.76 in unpaid wages for California workers during the last year, according to a report submitted to Governor Young by Will J. French, State director of industrial relations. The Division of Labor Statistics and Law Enforcement, French said, received 32,431 complaints of various sorts during 1927, a gain of 3.9 per cent over the previous year. Wage complaints made up 28,751 of the 1927 total.

The fossilized shoulder bones of an extinct species of animal, thought to have belonged to the Pliocene age, have been found 125 feet underground in a mine shaft in Butte county, according to word from Oroville. The specimens have been submitted to scientists at the University of California. The discovery was made by R. E. Blum, miner of Pentz.

Marin county supervisors, at their monthly meeting last week, voted to send a letter to Governor Young and other members of the Highway Commission expressing their appreciation of the $750,000 appropriation from State highway funds for Marin county roads. Highways between Sausalito and Ignacio and between San Rafael and Point San Quentin will benefit from the appropriations.

Governor C. C. Young and his cabinet directors are considering formulation of a program under which the California ocean beaches, fast passing into private control at many points, can be preserved for the people of future generations. "All Southern California beaches," according to the belief of Governor Young, "will be privately owned within fifty years unless something constructive can be done to preserve them for the public." Establishment of State parks on the ocean shore has been suggested as one means of assuring retention of choice beach lands for public recreational purposes.

Plans for a bridge to link Tiburon, Marin county, with Fleming Point, Alameda county, were revealed at San Rafael last week by T. A. Tomasini, San Francisco marine engineer. The structure, which will be six and one-half miles long, will cost approximately $18,000,000 and will take three and a half years to construct, Tomasini said. Tomasini declared that he represents eastern capital ready to start work within sixty days after receiving required franchises.

State Commander Phil Dodson of the American Legion has called upon each of the 300-odd posts of the World War Veterans' organization in California to join in a great tree-planting campaign during the coming months. Each post of the Legion will be asked to plant at least 100 trees as a part of the reforestation and civic beautification work of the organization in this State. "We hope to have 50,000 new trees planted by the American Legion members of California during this year in parks, along roadsides, on the mountains and in the valleys," Commander Dodson declares. "We will have accomplished something worthwhile for California when we have completed our program for this year," he said.

Appointment of Burke H. Critchfield, formerly with the United States Bureau of Agricultural Economics at San Francisco, as chief of the State division of markets, was announced a few days ago by Governor C. C. Young. Critchfield has been selected for the position by the Federal government and the State Department of Agriculture, headed by Director Geo. H. Hecke, in connection with renewal of the joint Federal-State marketing service arrangement in California, the governor said. Wells A. Sherman, who has been serving as chief of the State division of markets since last June, will return in the near future to his duties with the bureau of agricultural economics in Washington, D. C., it was announced.

One hundred and sixty pounds of gold in one slab, reputed to have had a value of nearly $40,000, has been found in the old Tightner mine at Alleghany, Sierra county, and has served to recall the days of bonanza mining in the Grass Valley section when fortunes were made and lost over-night. The find at Alleghany was made by the Sixteen to One Company, which two years ago took over the bulk of the Tightner holdings from the Clarke interests of Montana, which acquired the mine following its period of great production twenty years ago.

HOOVER APPOINTS MRS. HEDEGARD

Mrs. S. N. Hedegard has been appointed by Secretary Hoover as chairman of a committee to conduct a better Homes campaign in Campbell.

Mr. Hoover is president of Better Homes in America, an organization which each year sponsors a nation-wide educational campaign for Better Homes. The organization maintains headquarters in Washington, D. C., with James Ford in charge as executive director.

Better Homes in America was established to provide local communities with information as to the ways of improving housing conditions and home life, the work being carried on in communities through volunteer committees of local citizens. The campaign is sponsored locally by such organizations as Parent-Teacher Associations, Women's Clubs, Civic Associations and other having an interest in home improvement.

A man or woman who is active in civic affairs is appointed in each community to serve as chairman of the Better Homes committee for that place. This chairman then selects a committee of representative men and women to conduct the campaign. These campaigns vary according to the size and conditions of the community, and include programs of lectures, demonstrations and contests. Wherever possible a house is planned and built, according to best recognized standards of building and architecture, to show how a well designed, well constructed house can be brought within the reach of families of modest means. The house is furnished attractively and comfortably, but at a cost in keeping with the cost of the house and the income and needs of the family that might occupy it. The house is opened to the public during the Better Homes week, and hostesses are on hand to explain the features of the house and its furnishings and give other information.

Peter Pan Bakery Bought by Sarto

Mr. G. Sarto, an experienced baker of South San Francisco, has purchased the business and good will of the Peter Pan Bakery, from H. C. Tuttle and will continue to make the quality lines of bakery goods for which the plant is noted.

Mr. Sarto stated that there will be no change in the personel of the happy family of workers and solicits the same hearty community support accorded his predecessor.

At present Hal Tuttle has no definite plans, but hopes to live in our midst for some time. He will take a vacation at the golf course to get even with Ralph Hyde his present rival.

Mr. and Mrs. H. W. Morton had the misfortune to have the inside of their car badly damaged by fire while standing at the curb. They were able to return in it as the fire was extinguished before the mechanism was destroyed The cause of the trouble was not determined, although it was supposed to be a defect in wiring.

Announcement that a cotton gin will be established in Tehama county this spring, was made at Gerber last week by Henry Von Tagen, of the Oakland Oil Mills A location has not been selected yet, but it is likely to be at Gerber, Tehama or Vina. More than 2,500 acres will be planted to cotton this year in Tehama county.

The State board of prison directors has fixed the price of San Quentin grain bags at 10 cents each. The prison bag is standard size, 22x36 inches. It is important that orders be sent in as soon as possible so as to get the benefit of the present low price. Order blanks may be secured by corresponding with Warden James B. Holohan, at San Quentin.

COUNTY CONSOLIDATED N.T. VIEW TUESDAY

The regular monthly meeting of Santa Clara County Consolidated is scheduled for Mountain View, Tuesday, March 6. The Women's Club on Castro street will scene of this popular gathering of county boosters. The members of the Mountain View Women's Club are going to serve one of their famous meals and it is assured that the meeting will be a complete success judging from former meals prepared by this organization.

Additional plans for the Blossom Festival, the elaborate plans and a presentation of the importance to the county of the third annual Fiesta de las Rosas ,the advertising budget, and several other matters of importance have been announced as being on the program by Wendell Thomas, president.

P-T. A. MEETS TUES.

The Campbell Union Grammar School Parent Teachers' Association will hold its monthly meeting Tuesday, Mar. 6, at 2:15 p. m. in the kindergarten room. A large attendance is asked for the program will be splendid.

Mrs. Dana Thomas, the popular and interesting speaker, needs no introduction and is always a welcome addition to an afternoon's pleasure. She will have as her subject, "Spiritual Training."

The Glee Club, under the direction of Miss Nielson, will render a number of songs. They are always a drawing card.

Refreshments for all, also the kiddies to be cared for by the Campfire Girls. Please come.

FIRE DAMAGES HOME

Fire badly scortched the interior of the Pietro Scianna home on North Second street early Thursday morning. Apparently the conflagration started in several places at once, but gained little headway before the firemen arrived with the chemical and water. The fire was then soon extinguished with little more damage resulting. The curtains and draperies were all burned and the paint badly blistered in all rooms. There being practically no draft the blaze consumed the air and smothered itself with the exception of two small patches which the fire-fighters extinguished.

Sails to New York

Mr. and Mrs. E. E. Pomeroy of Saratoga sailed from San Francisco, February 18 on the new liner California. This most modern of all steamships is making its maiden trip to New York via the canal, with stops only at Panama and Havana. After a five-day visit in New York they will return by the same boat. Mrs. Pomeroy was Miss Violet Saunders, a graduate of Campbell High and has many friends here who wish them a pleasant voyage.

Seniors Prepare Play

Preparations for the Senior Class play of the C. U. H. S. are nearly completed and rehearsals are rounding the cast into shape.

The vehicle chosen for this years' efforts is "Quality Street," which will be presented Friday evening, March 16.

Watch for announcements of the cast and the story of the play.

Sallie Davidson was the recipient of a Lindberg air Mail this week carried by the noted flyer on his recent trip from Chicago to St. Louis. On the face of the letter was a horseshoe stampbearing the words "Lindberg again flies the air mail." Thousands of letters were sent at that time purposely for the colonel to carry and Sallie's was one of them.

PUNDITAS HOLD GUEST-DAY PARTY

The ladies of the Pundita Circle were hostesses Wednesday afternoon when they observed their annual guest day.

The community room of the library was a picture with its array of spring blossoms. Jars of japanese quince and plum blossoms were artistically placed about the fire place and one side of the room, while a charming color scheme of lavender and purple shades combined with yellow was successfully carried out with baskets of daffodils, heather and stocks. The same dainty colors were used in the nut cups, napkins and cake icings.

Mrs. J. J. Pardee, the president, greeted the guests with a few words of welcome, which was followed by the singing of America.

Mrs. W. T. Stone of San Jose, guest of Mrs. M. E. Purmort, gave two very pleasing whistling solos, playing her own accompaniment, "Forgotten," by Eugene Cowles, and "Night and Day," by Evans Lloyd.

One of the hostess club, Miss Anna Schulte, who is well known to Campbell audiences for her many delightful readings gave two numbers and later responded to a request for another. Her selections were, "Leap Year Leap," by Walter Ben Hare, (especially appropriate for February 29,) "The Man From Eldorado," by Robert Service and "Aunt Hannah Hayseed's First Visit to the City."

Miss Marjorie Barnes of San Jose, a pupil of Miss Lulu Pieper, who acted as her accompanist, sang two groups of songs and responded to an encore. Miss Barnes has a very pleasing voice which promises much as she is just entering young womanhood. She had made a happy choice of songs for the day and the season, "The Shepherdess," Franz Shubert, "Dreamin' Time," Lily Strickland, "The Cuckoo," Liza Lehman, "Come to the Fair," Easthope Martin, "Crying Water," by Bernard Hamblin, and "Animal Crackers," as the encore.

A very pleasant social time during which dainty refreshments were served, followed the program.

FARM PROBLEMS DISCUSSED AT LECTURE

The Monday evening lectures at the High School are receiving a most enthusiastic reception. Professor Lundvquist of Stanford University is a business man of wide experience as well as a world trained economist.

The meetings are full of pep and folks are taking an active part in the discussion period.

Everyone is invited to come and hear the interesting lecture and express his opinion along with others on current hard times.

The following topics will be discussed at next Monday's meeting:

Price Determining Factors.
Price Policies.
Market Analysis and forecast.
How can Bankers Help to stablize Business.
Various Methods of Distributing Farm Produce.

THRIFT SHOP OPENS

Monday is the day chosen for the opening of Campbell's Thrift Shop by Mrs. Castor. Dressmaking, altering and thrifty repairing will be her specialty and all kinds of cleaning, dyeing and pressing. Mrs. Castor, from her experience, has gained a knowledge of this line of work that enables her to turn out a finished piece of work that compares very favorably with the largest shops.

This has been her work with the Clean Cleaners and she is continuing at her home at 20 North Central avenue.

CHICKEN TALK AT CAMPBELL

Mr. Morton of the Sperry Flour Company gave a very fine lecture o nthe care and feeding of baby chicks Tuesday evening at the grange.

His talk was illustrated by lantern slides which made the lecture interesting as well as instructive. The hall was well filled and good attention was given. Much emphasis was placed on abundance of fresh air. The open front house now being preferred to all others.

Disease among hens and chickens was also dwelt on at some length, bringing out many interesting points.

The grange lecturer announced there would be another card party at Community Hall in the Library Building Saturday evening, March 3. We learn that these parties are very enjoyable occasions, bringing in quite a sum towards the grange hall fund as well as helping the library along, which is all a benefit to the community.

Six candidates were voted in and will receive the first and second degrees at the next meeting.

Pomona Grange meets March 10, afternoon, and evening, at Odd Fellows' Hall, San Jose. Members should bring lunch and enjoy a good time.

The plant exchange was a great success. There was a large quantity of plants of all kinds; flowering plants predominated with grape vines, quince and fig trees and ornamental plants interspersed. It is difficult to estimate what it would have cost the city dweller to purchase those plants at the nursery, but it would have run into quite a sum of money and here they were free for the taking —and all were taken. The next meeting of the grange will be on March 13.

MODERN EDUCATION MORE PRACTICAL

At the Kiwanis luncheon Tuesday Jos. Bennett, substituted in the chair for O. Strom and did it with profitable effect.

Dr. Frieland, director of the teacher training department of the San Jose State College, speaker of the hour, took as his subject, "New Models of Education" and threw considerable light on the general trend of modern education The changes are probably more pronounced in History. The new line will show us what we have and what we are that we may be the more thankful for it all. It will show both in standard of living and independence, from the jailed debtor of 100 years ago to the point where he can collect his wage first for any of his labors on any job.

With the wonderful surroundings and a thought of thankfulness, the restraining effect will be nore effective on those who might become criminals. It is the duty of each individual not only to keep conditions as good as they found them, but make them the better for coming generations. The new history or social science will deal with modern problems for the purpose of teaching students how to improve the world rather than how this or that was done in years past.

The spelling lists are being greatly reduced and unnecessary and unused subjects eliminated from the high school curriculum.

J. Warren Ayer, lieutenant governor of this district was a visitor.

The speaker next week will be Warren Pillsbury of San Francisco, who will speak on the world court and why the United States should join. Horace Gruwell will be chairman.

Miss Kittie Johnson and Miss Jessie Lewis were visitors in San Francisco over the week-end.

Phone 111.

By refusing to accept $1,500,000 offered to him by the Bancitaly Corporation and making a gift of it to the University of California, A P. Giannini, founder of the Bank of Italy, has put theory into practice. He believes in a wider distribution of wealth. The gift will be known as the Giannini Foundation. President W. W. Campbell of the university announced. One-third of the amount will be used to complete the agricultural unit of buildings of the campus by the erection of Giannini Hall. On account of the banker's deep interest in agricultural problems, all activities of the foundation will be embraced in the field of agricultural economics.

...pressing belief that the California unemployment situation can be materially relieved by increased highway construction activities, the state administration last week announced that new road building and maintenance projects involving approximately $13,000,000 will be placed under contract within the next six months. The announcement was made by Bert B. Meek, State director of public works, as the result of a conference with Governor C. C. Young on steps to provide early employment for California laborers. New construction enterprises to be placed under contract between now and June will entail expenditure of about $6,000,000, Meek said.

CONG'L. CHURCH NOTES

Rev. J. H. Bennett, Pastor

A prayerfully and carefully planned day of worship and instruction. Preacher, Rev. J. H. Bennett

11 a. m.—Subject: Teaching of Old Testament, "Cain and Abel."

Children's Talk: "Eat Your Crusts."

At 6:30—"Christian Endeavor Meeting." A talk on "Buddhism," by the Rev. J. H. Bennett.

At 7:30 p. m.—Stereopticon Lecture on "Buddishm."

The attention of all is called to our especially prepared and united Lenten and Easter arrangements.

The condition of winter vegetables in California during the first half of December is reported as favorable by the bureau of agricultural economics, United States Department of Agriculture. A few Southern California districts show the need of rain, but growing conditions in general are good. The harvest of tomatoes for shipment is over in all parts of the state, and the next big deal will be head lettuce in the Imperial Valley. Condition of the lettuce crop is given as 87 per cent of normal, with a porduction of 3,300,000 crates in prospect.

A Confession of Faith

By John Galsworthy

"At the back of all work, even a novelist's, lies some sort of philosophy. And if this novelist may for a moment let fall the veil from the face of his own, he will confess. That human realization of a First Cause is to him inconceivable. He is left to acceptance of what is. Out of Mystery we came, into Mystery return. Life and death, ebb and flow, day and night, world without beginning and without end, is all that he can grasp. But in such little certainty he sees no cause for gloom. Life for those who still have vital instinct in them is good enough in itself, even if it leads to nothing further; and we humans have only ourselves to blame if we alone, among the animals, so live that we lose the love of life for itself. And as for the parts we play, courage and kindness seem the elemental virtues, for between them they include all that is real in any of the others, alone make human life worth while and bring an inner happiness."

Backyard Inventory

Now that spring is almost here is it not time to take an inventory of your back yard. You say you would like to have some outdoor exercise. Why not investigate here. Perhaps your backyard is run down at the heel. It is possible you have allowed smelly rubbish to accumulate during the winter months, maybe you have let some brush heaps pile up. Just a few hours' work would make your backyard as attractive as your front yard, as it should be. And if you took your shovel and wheelbarrow and incinerated these rubbish piles perhaps your next door neighbor would think it was time for him to do some backyard housekeeping. And then his next door neighbor might be ashamed of his tin cans and ash heaps and brush piles and he would join the clean up squad. In this way the spring cleanup might become a contagion and before you knew all of Campbell would be neat as a pin.

Mushrooms

A mycologist is a person who studies mushrooms. A mycophagist is a person who eats mushrooms. On account of the late rains this season, the latter has had little to satisfy his palate, but now is coming into his own.

On the markets of Switzerland 80 varieties of edible mushrooms are permitted for sale. Few people know more than one or two. The meadow mushroom, sometimes called the button mushroom, is the favorite. This family, agaricus, has four well marked edible species, the meadow, the field, the forest and the double ring, to give popular names.

All mushrooms with a bulb cup or volva at the root, are not dangerous, but it is a good thing to suspect them as this is the best identificaion. Color or shape are not always reliable, but lend evidence on species when differentiations are determined.

The Boliti family of mushrooms, favored by French and Italian epicureans, flourish here. Cantharellus, or ochre mushroom, most of the Lactarius or milk mushrooms are good eating. Some have a peppery taste.

The puff-balls or lycoperdaceaeare all edible and are the safest forms of fungi to eat. The giant puff-ball has been picked by Dr. Annie Anderson on Overlook road weighing eight pounds and served three families with a delightful variation to their menus. This fungi is not edible unless pure white.

There is a garlic mushroom, a fairy-ring mushroom, the daintiest of all to eat. Morels, not so plentiful here, grow where forest fires have occured, they may be suffed with meat as they are hollow. Served thus they would delight a Roman feast.

Government bulletins on the fungi of this section may be obtained. The rule of look and know before you eat is a good one that is always safest to follow.

The law of the good hiker and good citizen is not to pick wild flowers or ferns. Santa Cruz county has a law that will almost land you in jail for looking at a fern or wild flower. So thoughtless have her many city visitors been that our neighbor county thinks in terms of barracades. Emerson has said, "to see flowers and not pick them is a sign of being civilized," or words to that effect. Enjoy and preserve and be civilized is the good hiker's motto.

Avoidance of thinking in terms of war would go far toward obviating any future need of terms of peace.—Monitor.

Installment Saving

INSTALLMENT *buying* has become a national habit. ∾ Installment *saving* buys future financial independence. ∾ Twenty dollars deposited systematically each month in an American Trust Company savings account, with interest at the rate of four percent, compounded semi-annually, will accumulate $245 in one year, $500 in two years, $1041 in four years, $1628 in six years, and $2949 in ten years. ∾ It pays to save.

METHODIST CHURCH

Campbell
W. C. ROBINS, Pastor

Sunday, March 4.—The lenten season reminds us of the self renunciation of our Lord. Let us not pass it by lightly. Put the following suggestions into practice and blessings will result. (1) Every member worshipping the communion of the saints is rewarding. (2) Every member working. Invite your friends and neighbors to church and to Christ. (3) Every member winning some one. In our town there are scores of men and women who are hungry for God and redemption. Win them. At 11 the church with consecration will celebrate the Sacraments of Lord's Supper. Brief address by pastor. Appropriate music.

At 6:30.—The Epworth League topic will be Adventures in Christian Living, John Lynden, leader.

At 7:30.—Half hour of gospel song. Special music by the choir and sermon by pastor. Topic: The Joy of Christian Living—Religion a Joy Bringer not a Joy Killer.

Wednesdy, 7:30.—Prayer and Fellowship service. Our annual roll call and supper Friday, March 30. Let every member be present.

The real "danger line" isn't on the teeth: it's the line that comes off of the tongue.

Thousands Visit Golden State Winter-Summer

Owner of Manx Hotel in San Francisco Is Optomistic in Predicting Future of Central California

SAN FRANCISCO, Feb. 29.—California will entertain more visitors in 1928 than ever before in its history. More than 100,000 people will visit the Golden State and will come by train, boat, automobile and even by hiking.

Mortimer Samuel

The above assertions were made by representative bankers, doctors, lawyers travelsalesmen, investment brokers and sheer business men who have visited the Manx Hotel during the past six months. These men, informed as they are of conditions in the various parts of the country from which they come, have told Mortimer Samuel, owner of the Manx, that California is spoken of as the goal during 1928 of thousands of vacationists in all parts of the United States.

Town Tales Tersely Told

Mr. W. H. Stray is able to be out and around again after his recent operation.

Geo. Burrow is confined to his home with a seige of the popular grippe that it holding so much attention these days.

Mr. and Mrs. W. L. Smith, who had spent the past week here with H. C. Smith and family returned to Twin Lakes Tuesday.

T. L. Mendel sailed Wednesday from San Francisco on a four months' tour of the world and visit at his old home in England.

Mr. and Mrs. Louis Carboni of Campbell and Mrs. C. H. Gribble of San Jose were dinner guests Saturday evening of Mr. and Mrs. Wendell Thomas of San Jose.

Mrs. M. E. Wade continues to be seriously ill at her home on Campbell avenue and the sympathy of the community is extended her family in their days of anxiety.

Mrs. Mabel Thompson returned to her duties at the Campbell Branch of the American Trust after an absence of several weeks owing to illness and subsequent operation.

Mr. and Mrs. A. F. Woodward, who spent some weeks here before Christmas have returned from Pasadena and are again located in Campbell. They came to California from Walla Walla, Wash.

Mr. and Mrs. Frank Hart are enjoying their annual visit with the Purmorts having spent part of the winter in the South with their daughter, Miss Una. They plan to start on their trip home to Anoka, Minn., sometime during the month.

Mr. and Mrs. R. R. Gilbert are now located in Campbell in the J. C. Ainsley cottage on N. Central avenue. Mr. Gilbert represents the Wayne Co. of San Francisco and has the territory from that city to San Luis Obispo. Mrs. Gilbert is a daughter of Mrs. C. E. Case.

Haliwell and Jones are now ready to serve you with high grade battery charging and service.

Mrs. Belle Eddlemon, mother of L. E. Eddlemon, has been ill for several days with an attack of flu.

Miss Margaret Pardee has been quite ill with cold and grippe, following a protracted siege with an abscessed wisdom tooth.

Mrs. Begley is here enjoying a visit with her parents, Mr. and Mrs. W. H. Mitchell of South First and Everet streets.

Miss Lois Gardner of the high school faculty and her mother, Mrs. Etta Gardner, moved to San Jose recently to make their home.

J. Harold Maxson has gone to Myrtle Creek, Ore., for a two weeks' visit. His mother, who had been visiting Miss Sadie Maxson accompanied him home.

Mr. Earl McCune, who was here with the American Trust, but has been located recently in San Francisco was visiting his uncle, L. M. Beall and family over Sunday.

Orchard City Grange will hold another of its popular card parties Saturday evening, March 3, in the Community Hall. Mr. and Mrs. W. R. Coupland will be the major domos on this occasion.

Geo. E. Hyde, R. H. Hyde and L. E. Vaughn of the Hyde Packing Company offices went to Del Monte Wednesday to attend the annual convention of the Canners' League of California, opening a three-day session that evening.

C. W. Shumway and family, who had been living in the Willow Glen district, have moved back to Campbell and are again occupying the Barron house on Los Gatos road. They came back because "we feel more at home in Campbell," Charlie said.

The faculty of the high school and the trustees, with the wives and husbands of both, enjoyed a party Saturday evening in the Community Hall, in honor of the new teachers. Stunts and games were directed by Miss Boesch and Miss Howes, and dainty refreshment were served.

Poster Exhibition at Stanford Univ.

To create a sentiment against the indiscriminate destruction of wild flowers and the destruction of bird life, the California Wildflower Conservation League, under the direction of its president, Mrs. Bertha M. Rice, will hold a poster exhibition i nthe art gallery at Stanford University for two weeks beginning March 4.

The school children and students of California have been invited to participate in this exhibition and to submit posters on the following topics: Save the Tyons; Keep the Home Poppies Growing—Leave Some for Seed; Protect the Birds, Don't Shoot! Photograph. The best posters received will be placed in the exhibit at Stanford and will later be taken on an exhibition tour to schools and colleges throughout the United States.

The American Art Aid, located at Stanford University, has prepared a special set of instructions to help those who wish to submit posters. These may be obtained, by writing to the American Art Aid, Stanford University, California. The exhibition will also be seen at the San Jose Teachers' College beginning March 26.

Big Athletes for Shepherds

SANTA CLARA, Feb. 29.—John L. "Pat" Connolly, one of the three six-foot athletes of the University of Santa Clara, to have been cast in the role of Shepherds in Clay M. Greene's "Passion Play," which is to be produced by the students, March 21 to 25, has been forced to give up his part because of a sudden attack of appendicitis which forced him to undergo an operation this week.

Connolly is now convalescent. His place in the cast has been taken by Warren Ahart of Marysville, star Six foot three inch football tackle and a junior in the College of Business Administration.

Edward Preston Murphy, director of the Passion Play, is in hopes that Connelly will not be forced to give up his role entirely and that he may be strong enough to play in it for a few performances.

The other Shepherds in the Passion Play are Timothy P. Connolly, Marshall Leahy and William Ahart, who are all more than six feet two inches in height.

Mrs. Frank Mills, sister of Rev. J. H. Bennett and also widow of Mrs. Bennett's brother sailed Wednesday from England on the Steamer Majestic for New York, and is expected to reach Campbell, Saturday, March 10 Mrs. Mills was held in England awaiting her turn in the English quota as she is coming to make her home here with her relatives and Campbell will extend her a cordial welcome.

C. W. Wolff and W. C. Bohnett are representing the J. C. Ainsley Packing Compnay at the Canners' convention at Del Monte.

These meetings are very beneficial to the fruit industry as they bring out ideas for bettering the packs and thereby increasing the demand for California canned goods.

Both births and deaths increased in California during 1927, while marriages, under the new three-day wedding notice law, showed a decrease, according to the official estimate of the State Department of Public Health announced last week by L. E. Ross, chief of the bureau of vital statistics. Doctor Stork delivered 84,400 babies in California during the last twelve months, as compared with 82,372 in 1926, Ross estimated, though the birth rate remained at 19.9 per 1,000 population. On this basis the California baby crop for 1927 amounted to approximately 253 1-5 tons. Deaths were placed at 62,200 for the year, or 14.7 per 1,000 population. In 1926 there were 58,742 deaths and the rate was 14.2.

A preliminary investigation of California's newest potential volcano—Glass mountain in the Modoc lava beds, Modoc county, has just been made by R. H. Finch, director of the Lassen Volcano Observatory, and George L. Collins of the National Park Service. Reports had come in from the forest service rangers of the Modoc National Forest that an area of Glass mountain had been discovered where vents were steaming copiously and emitting strong odors of sulphur. Glass mountain, which is considered a part of the Lassen volcano unit, is a peak 7,850 feet high and lies about seventy-five miles north of Mt. Lassen.

P. G. & E. Co. Increase Capacity

The Pacific Gas and Electric Company's budget for additions and betterments to plant in the San Jose division involves an expenditure of $2,506,540.

The major items of expenditure in the gas department are: $37,600 for the San Jose gas plant; $25,000 of which is for the installation of a 100,00 cubic foot high-pressure holder at Los Gatos. It is estimated that 1,850 new services will be installed in San Jose. In the Redwood City district it is estimated 1,500 services will be installed; $564,200 is to be expended for additions to the upper peninsula distribution system. Of this item $350,000 is for the installation of 11 miles of 16-inch high pressure main from the Potrero gas plant at San Francisco to San Bruno. 80,000 feet of new main will be laid at East San Mateo to rovide additional and better service facilities in that section.

J. D. Kuster, division manager states: "All sections served by the company show a substantial growth during the past year. This is indicated by a gain of 15,033 gas consumers and 21,801 electric consumers. The company is now serving 967,717 electric consumers.

"The use of gas increaseed 2,015,790,700 feet sold or a gain of 11.08 per cent. In electric sales the largest increases were shown among the domestic consumers whose usage increased 14.78 per cent. Heating and cooking consumers increased by 3.436. In this group the usage increased 32.64 per cent.

"New rate reductions to be made will result in a saving of $1,600,000 to the customers and the new schedules are designed to assist and encourage lighting consumers to make more extensive use of electricity for heating and cooking."

While the apple production situation in the United States is not discouraging as comparred with other farm products, this is not an opportune time for expansion of the apple industry, says Emil Rauchenstein of the University of California, in Bulletin 445 of the College of Agriculture. This bulletin, just published, is one of a series on the economic status of California crops, being prepared at the University of California.

Home demonstration agents introduced better nutrition methods in nearly eight thousand farm homes in California during 1927, according to the annual report of Prof. Harriet G. Eddy, state leader of home demonstration agents at the University of California. There were 5413 children of school age and 1037 of pre-school age enrolled in good growth and development projects in the state.

Dried milk and sterilized fresh cream will be the products of a factory being operated at Seventh and Orange streets in Chico, according to statements made by A. V. Russell, who is installing the necessary machinery. The plant is installed in a corrugated iron building 132 by 100 feet in dimensions and when completed will represent an investment of $50,000. It will use 50,000 pounds of milk daily.

One hundred and thirty-four cars of rice have been shipped from Biggs, Butte county, since October first when the rice season started. In October thirty-one cars of cleaned rice left Biggs, seven cars of paddy and six cars of rice bran. In November twenty-five cars of cleaned rice, two cars of paddy and seven cars of bran were shipped. In December twenty-five cars of clean rice and twelve cars of paddy left, while for the first two weeks in January eighteen cars of cleaned rice was shipped. This represents about one quarter of the season's crop. The bulk of the crop went to the bay districts but a big lot went to Porto Rico and some to Pennsylvania for making into puffed rice.

Experiments covering more than fifty years have proven that silk may be produced almost anywhere in California where the mulberry will grow. Notwithstanding the excellent climatic conditions, however, sericulture has never been worked out as a profitable commercial venture in California, although one company is now making an earnest effort in that direction. Southern California was selected as the place most suited to carry out the plans of the research staff. In March, 1926, 100,000 Burbank mulberry trees were set out on a 320-acre plot in the San Marcos district near Escondido in San Diego County. The planting has since been increased to 150,000 trees. In the meantime more than five miles of steel pipe lines have been laid for the distribution of water for irrigation and an overhead sprinkling system has been installed and is in operation.

You can't visualize a barrage unless you've seen one, but eating grapefruit gives you an idea.—Washington Post.

Citrus shipments from the Riverside district are considerably less this season than at the same time last year, according to recent figures. The crop is a light one, and the navels have ripened later than usual. Some excellent returns have been received, however, for Riverside navel oranges and Corona lemons. Since the beginning of the shipping season, November 1, 512 cars of oranges and eight cars of lemons have been shipped east. At the same date last season, 1323 cars of oranges and 25 cars of lemons had rolled.

CERTIFICATE OF CO-PARTNERSHIP TRANSACTING BUSINESS UNDER A FICTITIOUS NAME.

The undersigned A. J. Hocking, Minnie Williams and C. A. Blewitt hereby certify that they are co-partners transacting business as such in the City of San Jose, County of Santa Clara, State of California, under the firm name and style of "Hocking & Williams Co."

That said business was organized for the purpose of carrying on the business of Funeral Direcorts and Undertakers, and the sole persons interested in said business, their names in full, and their places of residence are as follows, to-wit:

A J. Hocking, residing at San Jose, California;

Minnie Williams, residing at San Jose, California;

C. A. Blewett, residing at San Jose, California.

IN WITNESS WHEREOF, we have hereunto set our hands this 2nd day of February, A. D. 1928.

A. J. HOCKING
MINNIE WILLIAMS
C. A. BLEWETT

STATE OF CALIFORNIA, County of Santa Clara; SS.

On this 2nd day of February in the year A. D. one thousand nine hundred and twenty-eight before me, L. L. BENSON, a Notary Public in and for the County of Santa Clara, State of California, personally appeared A. J. Hocking, Minnie Williams and C. A. Blewett, known to me to be the persons whose names are subscribed to the within instrument, and acknowledged to me that they executed the same.

WITNESS my hand and my official seal the day and year last above written.

(Seal)

L. L. BENSON,
Notary Public in and for Santa Clara County, State of California.

Anticipating a run on lamb chops, farmers of California now possess 3,528,000 head of sheep, and the prices are strong at $11.30 a head, $1.30 more than in 1927. The total sheep population is worth $40,014,000. Porkers are on the increase, with 614,000 accounted for, against 585,000 in 1926. But the value slumped from $17 to $13, and the total value showed a drop of $2,000,000 to $7,982,000.

It was a busy year for hens in California in 1927. Working on the theory that an egg a day keeps the ham on the platter, hens, old and otherwise, produced 1,787 carloads last year for markets outside the State. Just by way of comparison, the production in 1926 was 1,475 cars and in 1925 1,195 cars. No records are available for eggs consumed within the State of California.

A growing taste for milk among Californians made bossy a popular figure during the past year, and the population of milch cows of two years old in California is 602,000—a gain of 6,000. And cows have an average value of $83 against $78 in 1926. All other cattle, numbering 1,393,000 head, can feel some satisfaction in the fact that their value increased from $37 to $42.08 per head. This class of livestock is valued at $40,014,000—an increase of $7,000,000.

ROOM AND BOARD after Jan. 1. Furnace heat. Phone, Campbell 148 or Ballard 1528.

Quotations from Hall of Fame

Each separte star
Seems nothing; but a myriad scattered stars
Break up the night and make it beautiful.

New, cheerful lighting — free trial in your home

The money you spend for one of these lamps does considerable to improve the appearance of your furnishings.

For the abundance of soft, colorful light makes an "interior" seem lovelier. It's just like redecorating the whole room.

There is a reflector under the silk shade that distributes the light over the entire room. This is the new principle of design that combines beauty with good lighting and eliminates harmful glare and gloom.

The lamps have a base finished in silver or gold and there is a selection of four silk shades. Phone and ask our representative to place one of these lamps in your home for a three-day trial.

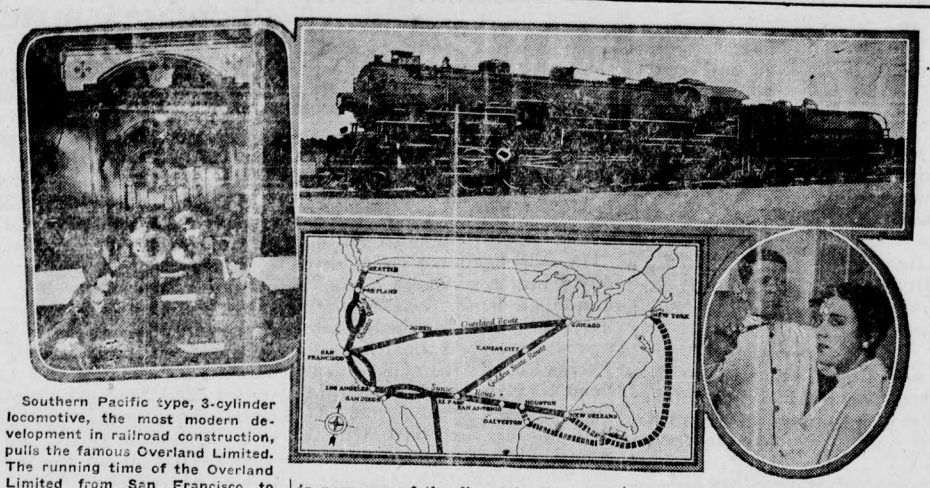
TRAIN TIME SLASHED TO EAST



Southern Pacific type, 3-cylinder locomotive, the most modern development in railroad construction, pulls the famous Overland Limited. The running time of the Overland Limited from San Francisco to Chicago will again be reduced effective March 4.

TIME will again be slashed between the Atlantic and the Pacific coasts.

A year ago Southern Pacific company reduced the schedule of the San Francisco Overland Limited, which operates between San Francisco and Chicago, from 68 to 63 hours.

Now comes the announcement by F. S. McGinnis, passenger traffic manager for the company, that the eastbound Overland Limited will make the journey in 61 hours and 15 minutes, thus providing an additional full business day at Chicago. Under the new arrangement the Overland Limited eastbound and westbound arrive at eastern and western terminals at approximately the same time.

In making the announcement McGinnis called attention to the important improvement made by western railroads, particularly Southern Pacific, in their passenger service in the last two years.

"During the past two years Southern Pacific spent more than $4,300,000 in purchasing new passenger train equipment for use on Pacific Lines," said McGinnis. "New type Pullman cars with many features not heretofore included in railroad architecture are being added to the Overland Limited at the present time. This train is now one of the finest in the country."

During the past year Southern Pacific has entirely changed the equipment of the Sunset Limited which operates between San Francisco and New Orleans. The equipment on that route now includes new Pullmans, new club, observation and dining cars, shower baths, and valet service, barber and ladies' maid. On the Sunset route from New York to New Orleans, the new passenger steamer "Dixie" has been added. An additional train to Chicago, the "Gold Coast Limited," with new Pullmans, dining cars, club and observation cars, is also among the recent improvements.

One of the notable achievements in the 1927 record of western transportation was the completion of the new Cascade Line in Oregon which provides an alternate route through a scenic region opened for the first time. This route, over which the new Cascade operates, was constructed at a cost of $39,000,000. The Cascade makes the trip between San Francisco and Portland in 23 hours and consists of the same grade of equipment as the Overland Limited and the Golden State Limited.

Trains over the new Cascade line carry through Pullman cars to Tacoma and Seattle. In pleasant weather open-top observation cars are operated through the scenic parts of the line. A feature of the institution of this new line was the addition of an all-coach train between San Francisco and Portland.

Among other improvements made by Southern Pacific during the past year was the placing of bedroom cars and light supper refreshment service on the Lark, favored train between San Francisco and Los Angeles. New coaches of an unusually comfortable type have been added to the crack Daylight which makes the scenic nonstop trip over the Coast route between San Francisco and Los Angeles in 12 hours. Fast service to Sacramento with 13 trains daily is among the improvements in train facilities.

In its peninsula service Southern Pacific now operates 32 trains throughout the day to San Jose and way points. Another innovation this year was the institution of through Pullman service to Yosemite by way of Merced and over the new route of the Yosemite Valley railroad to El Portal. A year ago Southern Pacific instituted through Pullman service to Lake Tahoe.

Another train added to Southern Pacific's service during the past year is the San Joaquin, a new daylight limited which operates between San Francisco and Los Angeles by way the San Joaquin valley.

The tenth annual Walnut Grower's Institute will be held in the auditorium of the Chino High School Saturday, February 25, at Chino, according to plans announced by the inter-county walnut department of the farm bureau and the agricultural extension service. Discussion of problems relating to walnut culture will form the major part of the program, which will be under the direction of John P. Thille, chairman of the inter-county walnut department.

Great losses resulting from ill-advised farming operations will be prevented by the operation of the $1,500,000, A. P. Giannini Foundation. Clarence R. Niklason, a special agent of the United States Department of Commerce, so said upon his arrival in San Francisco last week. The fund will be administered through the agricultural college at the University of California and Niklason believes that advice given to ranchers and fruit growers will prevent losses by ascertaining the agricultural worth of land before losses are incurred by crop failures

The new California law advancing the age of majority for girls from 18 to 21 years, effective last July, is not retroactive, Attorney General U. S. Webb ruled last week in an opinion to Mrs. Anna L. Saylor, state director of social welfare. The attorney general said there "is no question that a girl who reaches the age of 18 prior to July 28, 1927, has attained her majority."

Ground has been broken for the new $300,000 Animal Science Building at the College of Agriculture, University of California, at Davis. The plans now call for the addition of a new wing, made possible by the low bid submitted by the contractor, K. E. Parker Company.

The extent of drunken driving on California highways was indicated last week when the State division of motor vehicles announced that 292 out of 502 revocations of operators and chauffeurs licenses during 1927 involved cases where automobiles were driven by intoxicated persons. The 502 cases cited by the State division include all violations of the motor vehicle act or cancelled during the last twelve months.

Money appropriated by the legislature for specific purposes in the department of education cannot be consolidated into a general fund, to be disbursed along other lines, according to an opinion rendered to William John Cooper, head of the department by Attorney General U. S. Webb. The question came up in connection with an appropriation of $114,140 included in the 1927 budget for the support of the State Board of Education.

The Disabled Veterans of the World War, department of California, last week filed incorporation papers with the Secretary of State as a non-profit organization with headquarters in San Francisco. The papers were submitted by Richard C. Queen, Fred Schmidt and James Forrest of San Francisco, and Arthur Shepperd, Fresno; Frank McDermott, San Bernardino, and Manford Bennett, Fall Brook

The planting season is on at Redlands, and while there will not be any large planting of citrus or deciduous fruits in the Redlands district, some new acreage is planned. In Yucaipa, plans are under way for planting a considerable acreage to pears and to peaches.

No shortage of cars to handle the naval orange crop, which is ripening in the Ontario section is seen by growers. Railroads have long been preparing equipment for the rush of oranges from this community, and refrigerator cars are being spotted to be ready for the sudden car demand, as picking and packing of navels starts in earnest. The local season will last well into May, and perhaps later, it is stated by growers.

Citrus growers throughout the State are much interested in the contest to determine the "world's champion orange grower," which will be inaugurated the first time at the 18th National Orange Show to be held in the city of San Bernardino, February 16-26. More than 100 entries are expected, judging from the number already in, and from the inquiries that have been received by General Manager R. H. Mack.

Announcement has just been made by the State Department of Agriculture of the intention to place a map of large scale, showing Southern California fruit markets throughout the United States at the Eighteenth National Orange Show to be held at San Bernardino, February 16-23. L. F. Green, personal representative of Geo. H. Hecke, director of the State Department of Agriculture, was at San Bernardino recently in conference with Horticulaural Commissioner John P. Coy and Arthur J. Brown, chairman of the Orange show department of citrus education, in reference to the feature.

Twelve stops are to be made by the California Agriculture Special, a 14-car demonstration train to be run by the Agricultural Extension Service, University of California, in cooperatoin with the Southern Pacific Company. The itinerary, with morning stops named first, is as follows: March 19, Newman and Los Banos; March 20, Delano and Bakersfield; March 21, Portervilie and Visalia; March 22, Hanford and Kingsburg; March 23, Fresno and Madera; March 24, Merced and Turlock; March 26, Modesto and Manteca; March 27, Stockton and Lodi; March 28, Auburn and Sacramento; March 29, Lincoln and Marysville; March 30, Chico and Red Bluff; March 31, Arbuckle and Dixon.

Results of actual farm tests with electric brooders are described in a recent bulletin written by Prof. B. D. Moses, of the division of agricultural engineering of the University of California. According to the author, at least 5000 brooders heated by electricity are now in use on California farms, and the demand for data on the operations of such appliances caused the university to conduct a thorough investigation of their merits. Thirty-three tests were run on eight farms with the nonglowing type of heaters, and sixteen tests on six frames with the radiant or glowing type. The cost per chick for the nonglowing types was .948 cents, and for the radiant type 3.11 cents. The mortality for the non-glowing type was 17.4 per cent, and for the glowing type 13.3 per cent, with an average brooder area of 4.88 square inches for the former, and 7.83 for the latter.

Permits for water diversion in several parts of the State, representing contemplated development work to cost approximately $4,000,000, were announced by the State division of water rights last week as having been issued during the month of January. In that period a total of sixteen permits were issued and twenty-eight applications were received. Among the largest of the permits were two issued to the Snow Mountain Water and Power Company of San Francisco for diversions in Lake County for the manufacture of electric power to be wholesaled to companies supplying cities in the Napa, Santa Rosa, Mendocino and Lake counties, and for the distribution of water to the Potter Valley Irrigation District for 4,905 acres of land.

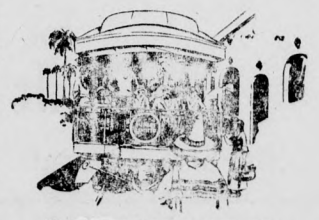
East
through the
Sunny South



—Sunset Limited, famed 'round the world, offers a journey of rare attraction.

Southern Pacific's colorful *Sunset Route* lies along the nation's southern border. Through California's orange lands, across fertile mesas and broad plains and along placid Louisiana bayous to New Orleans. All the way the romance and historical interest of the Southwest and the Old South. See Apache Trail highway—one day side trip in Arizona.

It costs no more to go east this way to New York. From New Orleans, continue by train or enjoy the delightful ocean voyage to New York aboard Southern Pacific's steamship (meals and berth on the ship included in your fare).

Over this route, "Sunset Limited" carries you swiftly and comfortably. Its appointments are complete in every detail. Also the "Argonaut" from Los Angeles over this route.

Go this way and return some other Southern Pacific route if you wish —*Overland Route*, Chicago to San Francisco; *Golden State*, the direct line from Chicago to Los Angeles and San Diego; or *Shasta Route*, west over northern lines and south from Seattle and Portland.

Read the interesting *Sunset Route* booklet describing the trip in detail. Ask for a copy and for further details.

Sunset Limited
